

## REMOVAL OF GRASSES / LITTORALS FROM THE LAKES:

Here is what you have to do to get the weeds / grass / littorals removed from the lake behind your house. Gateway Services has 30 days to act. You will receive a confirmation via email from GSCDD. You should see someone out there in a couple weeks putting stakes on your property line. Please leave those alone. It is what guides the vendor in where to spray. Also, each homeowner must make the request for their property. If the grasses continue onto your neighbors' property, they must also make the request, so share this information!

The north lake – Silver Sands, Lake Pines etc. is Lake 85  
The central lake where the clubhouse is located is Lake 88  
The south lake (the really weedy one) is Lake 89  
The lake behind the villas across from the church is Lake 90.

Email your request to [customercare@gatewaydistrict.org](mailto:customercare@gatewaydistrict.org)

You can copy, paste, and complete the template below to make your request.

My name is \_\_\_\_\_. I live at \_\_\_\_\_ in the Silverlakes community. My property backs onto Lake \_\_\_\_\_. The development order for Lake \_\_\_\_\_ does not include any littoral planting requirements.

I therefore request that the vegetation in the pond behind my home be removed pursuant to the recently adopted Surface Water System Maintenance Standards – page 4.

Thank You
