

Stormwater System Maintenance and Repairs Update

The District previously informed you of work related to ongoing Basin 4 Stormwater System Maintenance and Repairs in your community. As of now, the work has advanced to plugging pipe ends and thoroughly vacuuming pipes and catch basins. Temporary water ponding may be visible while pipes are plugged.

Residents may observe divers in the ponds, a vacuum truck, a mobile dive station for diver support and communication staged on roadways, as well as pumps, air compressors, and an amphibious vehicle utilized for the work.

As a reminder, the estimated duration of the project is anticipated to be 60 to 90 days. However, unforeseen delays, such as adverse weather conditions or material issues, may potentially extend this timeframe. While we are committed to minimizing disruptions, there may be occasional interruptions in the scheduled work efforts. We ask for your understanding and cooperation during such instances. The entire project, which commenced in July 2023, is expected to be completed in 180 days.

For a streamlined process and to ensure residents receive accurate information, please direct all questions regarding the stormwater system maintenance and repair work to the GSCDD via phone (239) 561-1313 or online at <https://gatewaydistrict.org/rfa/>.

Thank you for your understanding and patience as we improve the community's infrastructure.
